### Abstract of EP0787979

The dispenser has a container (1) of the fluent solid product and a neck (2) leading into a delivery device (10) with a discharger (30) for individual doses. A housing (11) with an inlet (12) and an offset outlet (13) can be fitted to the neck. The discharger co-operating with the outlet incorporates one or more metering chambers (31) and can be slid or rotated between a loading position with the chamber directly under the inlet, and a discharging position with the chamber above the outlet.
